EDUCATION

Arizona State University

Bachelor of Science - Psychology
September 2014 - December 2017

University of Arizona

Full Stack Web Development Bootcamp
June 2022 - Present

SUMMARY

Dedicated and tenacious engineer working towards my certification as a **Full Stack Web Developer** through the University of Arizona Coding Bootcamp. I am looking for a position where I can take my new found passion and education and thrive as an innovative team player.

I currently have fundamental knowledge of HTML5, CSS3, and JavaScript. Examples of my work in both front-end code and full-stack applications can be viewed in my public GitHub repo where I have utilized CSS frameworks such as Bootstrap and UI kit.

In my current role as a design engineer for fire protection systems I have built a solid foundation for proper planning, scheduling and execution of my work, which applies across all engineering disciplines. I have successfully designed both residential and commercial systems using CAD based software. I have continually pursued improving myself through learning and certification opportunities: NICET Level 2 in water-based systems layout.

EXPERIENCE

Design Engineer - RCI Systems, Inc.

April 2019 - Present

As a design engineer, I am responsible for handling the design and calculations for any Fire Protection drawing that's needed. Responsibilities include managing the project budget, handling any requests for information or coordination with other trades, as well as listing material for field installation.

Associate Client Support Consultant - ADP

August 2018 - April 2019

Associate Client Support Consultants assist callers as the front line service position within the call center. The Consultant primarily specializes in assisting with payroll while also containing the knowledge to get clients to the right place should they require assistance with other ADP products.

Site Coordinator - Gilbert Public Schools

January 2016 - August 2018

A site coordinator is responsible for overseeing site operations. Tasks included supervision of children, submitting documentation of weekly activities, creating supply orders, and interacting directly with the parents of the children in the program.
